Insert right-hand needle in loop purlways, purl a stitch and slip onto left-hand needle (taking care not to twist the st). **Insert right-hand needle knitways between last 2 sts and knit a stitch, slip the stitch onto left-hand needle, insert right-hand needle purlways between last 2 sts and purl a stitch, slip the stitch made onto left-hand needle. Repeat from ** for required number of stitches.

Knit Stitch

Purl Stitch

m a t t r e s s s t i t c h

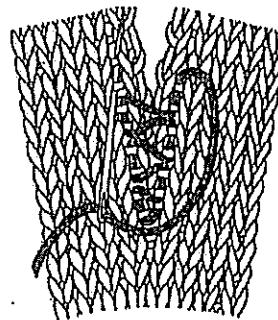

This seam will give your handknit a professional finish. Even if you have always used backstitch or oversewn seams, try this method and you will be surprised how easy it is and how much better the seams look and feel.

Mattress stitch should be worked one whole stitch in from the edge. It can even be worked on shaped edges - as you are working from the right side, it is easy to see where you are and to keep the seam neat and straight.

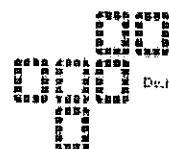

When starting, leave a long end which can be secured by running it back along the edge when the seam is completed. If the seam needs to be undone, simply pull this end, drawing the yarn through the stitches.

1. With right side facing you, lay the two pieces to be joined flat and edge to edge. Thread a knitter's needle and insert the needle between the edge stitch and the second stitch on the first row. Pass the needle under two rows, then bring it back through to the front.
2. Return to the opposite side and, working under two rows at the same time throughout, repeat this zigzag action always taking the needle under the strands that correspond exactly to the other side, and going into the hole that the last stitch on that side came out of, taking care not to miss any rows.

The mattress stitch stitching should be elastic without being loose — while working keep yarn held firm, not pulling sts too tightly.

Please choose which of the four patterns you would like to make

Please note

We would like you to try the special cast on method noted at the bottom of the last page as this would make it easier for nurses to keep tiny fingers from getting entangled. It should also be noted that all seams be kept as flat as possible. We suggest that they be sewn using the mattress stitch.

The patterns have been designed especially for King Edward Memorial Hospital Special Care Nursery and need to be plain e.g. no patterns with lacey holes, although cables, moss stitch or stripes will be accepted.
